What is OPEX

Welcome to the World of OPX, a Cryptocurrency created in Kyrgyzstan.

OPX is a stablecoin, a digital asset pegged to the Kyrgyz som (KGS), and is designed to facilitate payment transactions, as well as to protect against the volatility common to many other cryptocurrencies.

The goal of OPX is to create a reliable and efficient means of payment and store of value that contributes to the economic growth and development of Kyrgyzstan. It helps reduce costs associated with international payments, simplifies commercial transactions.

- ✓ Stablecoin
- ✓ Pegged to the Kyrgyz SOM
- ✓ Facilitates Payment
- ✓ Protects Against Volatility
- ✓ Means for Storing Valuables
- ✓ Provides Financial Security
